Packing House Official Intimates That Retail Dealers Have Not Kept Pace With the Falling Wholesale Market—Hogs on the Hoof Are Down to 1913 Pre-War Prices—Wholesale Price of Carcass Beef Has Dropped 17 Per Cent. Since September 1—Facts Revealed in Monthly Report of the Institute of American Meat Packers.

Chicago, Dec. 2.—(By the A. P.)—Hogs on the hoof have returned to what is practically their 1913 pre-war price, judging from figures obtained today from one of the "big five" packers. Pork and pork products at wholesale, and their way toward that same level, the monthly report of the Institute of American Meat Packers indicates and have reached the state prevailing in April 1917, when the United States entered the war.

Beef, also, is on the downward path, the wholesale price of carcass beef having dropped seventeen per cent. since September 1, according to the Institute's figures.

The highest drop recorded, however, is in live hogs. The packing house figures show pork on the hoof brought eight cents a pound in November, 1913. During the war the farmer was virtually guaranteed a minimum average of 17 1/2 to 23 cents a pound. Today hogs are back around 10 to 12 1/2 c.

Retail prices, however, have not kept pace with the falling wholesale market, the packing house official said, but he declined to be quoted directly on this ground that retailers might boycott his company.

"The bulletin of the meat packer's institute for the month of November says that during the period the wholesale price of pork loins declined 27 per cent. making a total drop of 45 per cent. since

GOVERNORS ARE SOLICITORS FOR THE FARMERS

Governor Holcomb Member of Committee of Five to Draft Resolutions Urging Federal Action—Recommends the Creation of a Finance Corporation to Make Loans to Foreign Countries For Purchase of Foodstuffs and Other Products in America—Would Have All Banks Adopt a Liberal Policy of Renewals on Farmers' Indebtedness.

Harrisburg, Pa., Dec. 2.—The governor's conference today adopted a committee report urging the federal government to create a finance corporation which through loans to foreign countries, will permit export of American foodstuffs and other products to relieve the critical situation confronting the nation's farmers.

The report further urged the federal government to advise all banks to adopt a liberal policy of renewals on farmers' indebtedness.

The action was taken on the recommendation of a committee of five governors, which was presented by the following report:

"The financial situation in the whole country is one of the gravest in the history of the nation. All lines of business are realizing heavy losses but the swift decline of prices of farm commodities is the most serious of all. The situation demands infinite patience and forbearance and supreme wisdom and courage. Nothing but evil can result from anger or fear.

"We believe that the tenaciousness of the situation can be relieved in several ways:

"1.—Let every individual do all he can to help and encourage his neighbor. Let there be a complete mobilization of the financial and spiritual assets of every community. Neither God nor the government ought to be asked to help those who do not first help themselves. There ought to be a united effort in every community to keep any good man from being destroyed by the economic situation.
